## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Bodnar et al.(5,143,945).

Bodnar et al. disclose preparations of rigid polyurethane foams comprising mixing and reacting isocyanate, polyol, water, catalyst, and low molecular weight acid compounds which read on the compositions and methods of applicants' claims. (see column 4 lines 66 et seq. and column 3 line 60 – column 4 line 28, as well as, the entire document).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bodnar et al. as applied to claims 1-8 and 13-16 above, and further in view of Tsai (4,673,696).

Bodnar et al. differs from claims 9-12 in that it does not disclose the employment of maleic acid esters. However, Tsai discloses the employment of maleic acid esters as compatibility imparting agents in the preparation of urethane polymers (see abstract, examples, and the entire document). Accordingly, it would have been obvious for one having ordinary skill in the art to have employed the maleic acid ester compatibility agents of Tsai in the preparations of Bodnar et al. for the purpose of imparting their compatibilizing effects to the materials employed in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Trinks et al.(5,349,040) is cited (column 3 lines 6-9) for its disclosure pertaining to Tsai {cited above} and other relevant materials in the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Cooney whose telephone number is 571-272-1070. The examiner can normally be reached on M-F from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck, can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
